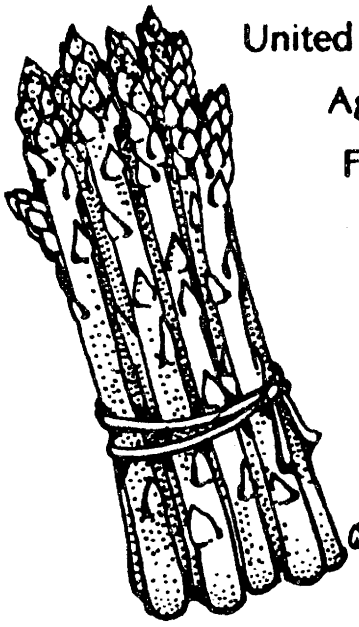
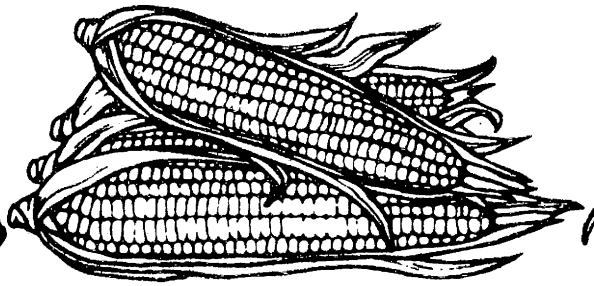
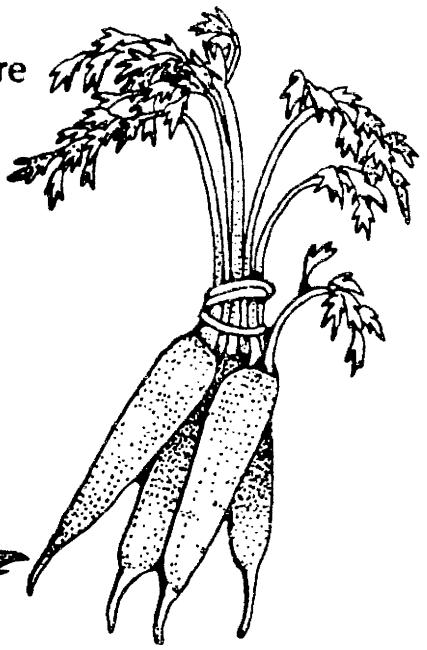
WASHINGTON STATE DEPARTMENT
OF AGRICULTURE COOPERATING



United States Department of Agriculture
Agricultural Marketing Service
Fruit and Vegetable Division
Market News Branch





F O R E W O R D

The U. S. Department of Agriculture, Agricultural Marketing Service in cooperation with the Washington State Department of Agriculture issued daily market reports on Asparagus from April 9th through June 29, 1990; on Carrots from July 30th through December 14, 1990 and on Sweet Corn from July 6th through September 5, 1990.

We wish to express our appreciation to the growers, shippers, buyers, processors, railroad officials, the Federal-State Inspection Service, the U.S.D.A. National Agricultural Statistics Service and the U. S. Weather Bureau for their cooperation in providing the information carried on the daily reports and in this summary.

Additional copies may be obtained by sending a check for $10.00 for each summary made out to the U. S. Department of Agriculture. Mail requests to the Federal-State Market News Service; 2015 South First Street, Room 4; Yakima, WA. 98903. Phone orders are also accepted: (509) 575-2494.

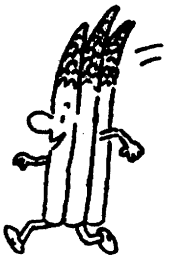
MARKETING WASHINGTON ASPARAGUS - 1990 CROP
GENERAL COMMENTS



WEATHER, GROWING & HARVESTING CONDITIONS: With warmer temperatures the third week of March, farmers began preparing fields that were as much as 10 days to two weeks behind. Early April brought cool nightime temperatures, limiting early volumes of asparagus. Harvest was underway in Benton, Franklin and Yakima counties by mid-April. Adequate growing conditions mostly prevailed though late April and May had periods of below normal temperatures and rain. The Benton county harvest peaked in late April as growers were harvesting a fairly steady supply of quality asparagus. With near normal temperatures for late May and most of June, the harvest was winding down in Benton and Franklin counties by June 11th. Yakima county's harvest continued with shipments until July.

PRODUCTION: Washington growers harvested 30,000 acres for the fresh and processed markets in 1990, down 2,000 acres from 1989. With less production acreage but higher yields per acre, total production remained constant in 1990 with 1,070 - 1,000 cwt compared to 1,024 in 1989. At $53.80 per cwt., the 1990 crop earned just under 55 million dollars, 37% of the U.S. total. The fresh market accounted for 27% of the total production - 280,000 cwt. with a total value of $19,544,000.

MARKETING: On April 9, 1990 the first f.o.b. was issued with pyramid crates, 85% or more green, 8-9 inch cut, Washington Extra Fancy, large and standard at $22.00-23.00. As supplies gradually increased, prices fell to the season's low on April 25th with large at $14.00-16.00 and standard $16.00-17.00. On April 30th, prices jumped to $17.00-18.00 and continued upward closing the week ending May 19th with large at $22.00-24.00 and standard at $24.00-25.00. During this period, shipping volumes were hitting season highs. Prices trended down again before starting to rise near the second harvest peak, the week ending June 16th with large at $22.00 and standard at $24.00-26.00. Prices continued to trend upward after this harvest peak as supplies began to dwindle. The last f.o.b. was issued on July 2, 1990 with large and standard at $32.00.

The first report for Washington Consumer Packs 1/4 inch minimum and 1 1/2 inch maximum white, random length, 20 pound cartons was April 9, 1990 at $10.00. the season high of $10.00-11.00 followed within the first week. Prices dropped to the season low of $9.00 and were generally steady. A dollar increase occurred on May 8th, after which prices were again steady for 10 days. After a one day price increase to $10.00-11.00 on June 21st, prices settled at $9.00-10.00 through the last report of the season on June 19, 1990.

SHIPMENTS: In 1988, Washington growers shipped 24.77 million pounds of asparagus, down 520,000 pounds from the record 25.29 million pounds shipped in 1989, but up 1.43 million from the 23.34 million pounds shipped in 1988. Shipments peaked the week ending May 12th with 3 million pounds compared to last years high of 3.72 million pounds shipped the week ending May 6, 1989.

MARKETING WASHINGTON CARROTS - 1990 CROP
GENERAL COMMENTS

WEATHER, GROWING & HARVESTING CONDITIONS: In Thurston and Franklin counties, growers began preparing fields in late March and early April. Seeding was underway by mid-April. For the remainder of April, carrot seeding progressed under generally good conditions. May's cool, damp weather prolonged seed germination and vegetable growth in most areas. Seeding continued in late areas when conditions allowed. June and July brought warm temperatures, prompting more normal growth and irrigation was needed in Cowlitz county. The harvest started in early August with generally good quality from Benton, Franklin and Yakima counties. Some early yields were variable as a result of the hot weather in south-central Washington counties. Harvest volume steadily increased through August, maintaining a constant level through mid-fall and early winter. By the week ending December 15, 1990, harvest volume was rapidly decreading as much of the northwest was engulfed in an arctic cold blast. A few shipments would continue into late December before another arctic blast swept the area by New Years.

PRODUCTION: Based on figures from the National Agricultural Statistics Service, Washington and Oregon produced 7,800 acres of carrots with 2,093 going to fresh market. This is below the 2,312 fresh market acres of 1989 and above the 1,684 acres of 1988.

Yields in Washington averaged 490 cwt. per acre and northwest Oregon 520 cwt. per acre. Overall production for the fresh market totaled 1,049,000 cwt., compared to 1,217,000 cwt. and 883,000 cwt. produced in 1989 and 1988.

According to figures from the N.A.S.S., Washington and northwest Oregon's fresh market carrots averaged $17.03 per cwt., up from $12.11 in 1989 and down from $18.12 per cwt. in 1988.

MARKETING: The first f.o.b. for 48/1 pound and 24/2 pound film bags was issued on July 30, 1990 at $5.00-6.00, the season's low. Prices remained generally unchanged the first three months of marketing, except for a period from September 15th through October 10th where the price range narrowed to $5.50-6.00. Prices began to increase in late October peaking at the season high of $9.00-10.00 on November 16th. This $9.00-10.00 price range was maintained until December 11th when prices dipped 50 cents. The last f.o.b. was issued December 13, 1990 at $8.50-10.00.

Prices for 25 pound loose jumbos began the season at $2.00-3.00, the season's low. This $2.00-3.00 range was steady until August 20th when prices began to slowly strengthen. By Labor Day, prices were at $5.00-6.00. These prices would remain steady for several weeks before beginning a gradual decline. By October 9th, prices would be at $2.50-3.50. This $2.50-3.50 price range was steady through October and early November. A holiday season rally saw jumbo prices rise to $4.50-4.75 before the last f.o.b. price of $4.75 was issued on December 10, 1990.

SHIPMENTS: Shipments totaled 37.34 million pounds, down from the 45.5 million pounds in 1989, but up from the 31.33 million pounds shipped in 1988. Weekly shipments averaged 1,697,300 pounds (or 33,946 - 50 pound units) compared to 1,520,000 pounds (30,400 - 50 pound units) shipped in 1989. Carrot shipments peaked the week ending November 10th when 2,270,000 pounds (45,400 - 50 pound units) were shipped.

WASHINGTON CORN - 1990 CROP
GENERAL COMMENTS

GROWING & HARVESTING: The third week of April growers began planting corn in Grant, King, and Pierce counties. Yakima and Kittitas county growers had begun planting by the end of April. Planting continued throughout May although showers and cool weather slowed progess at times. The weather improved by mid-June and the corn was tasseling in Grant County by July 1st.

The weather turned hot and growers were harvesting some volume by mid-July. By the end of August nearly 95 percent of the fresh market corn had been harvested. Mild fall weather allowed growers to continue shipping well into September.

PRODUCTION: According to The Agricultural Statistics Service of the U.S.D.A., growers harvested 2,100 fresh market acres in 1990, 400 less than the 2,500 acres in 1989 and well below the 3,200 acres in 1988. Yields were also down slightly averaging 110 cwt per acre compared 120 cwt/acre in 1989 and 130 cwt/acre in 1988. This combination of reduced acreage and lower yields cut overall production to 231,000 cwt in 1990, 77% of the 1989 total(300,000 cwt), and 56% of the 1988 total(416,000 cwt). Value per cwt was $13.80 in 1990, up from $12.70 in 1989, and $13.30 in 1988.

PACKAGING: Most of the sweet corn for fresh market was packed in 50 -lb cartons containing approximately 5 dozen ears.

MARKETING: The first FOB for Yellow sweet corn was issued July 9, 1990 at a season high of $8.00-9.00 per carton. As the volume shipped began to rise in late July prices gradually declined to $6.00. Prices remained steady through the 8th of August then began to rise slowly to $6.50-7.00 by the week ending August 11th. Prices then began to fall once again to $6.00. The last FOB was issued August 28th at $6.00.

SHIPMENTS: Shipments of fresh market sweet corn from Washington totaled 2,926 - 10,000 lb units (585,200 - 50 lb cartons). This was up 17% from the 2,496 - 10,000 lb. units shipped in 1989. Peak movement occurred the weeks ending July 14th and 21st when 565 - 10,000 lb units (113,000 cartons) and 557 - 10,000 lb units (111,400 cartons) were shipped respectively. The combined 1,122 - 10,000 lb units shipped during this two week period accounted for 38% of the total shipments from Washington. In 1989, the peak movement occurred the week ending July 22nd when 404 - 10,000 lb units were shipped.
